

**AQUEOUS INK-JET INKS FOR PRINTING
ON COMMERCIAL OFFSET COATED MEDIA**

ABSTRACT OF THE DISCLOSURE

5 An aqueous ink-jet ink composition for printing on
offset media is disclosed comprising an ink colorant, an
effective amount of at least one surfactant, and an
effective amount of at least one aprotic polar solvent
wherein the solvent is comprised of molecules having a
10 molecular weight from 40 to 1500. Optionally, an
effective amount of a non-aprotic polar solvent can be
added. The aqueous ink-jet inks of the present invention
are effective for printing on many commercially available
offset papers and other media.
